Summary

Junior software programmer at Edict Systems. Avid computer hobbyist, with a strong knowledge base covering Windows, Linux and set-up of a variety of server applications. Skilled aircraft mechanic with extensive experience in the Army National Guard and light experience in commercial aviation. Seeking remote employment opportunities in any location, that combine my interest in technology with a strong military work ethic.

Experience

Edict Systems

Software Programmer

12/2017 - 12/2020

Develop and maintain custom EDI document editor implementations for each of Edict's trading partners

- Trained two new employees in developing file transformation pipelines
- Made an internal Markdown documentation file viewer and editor in JavaScript and Electron
- Partially made an internal document parser using .NET Core
- Made an internal template generator for scaffolding C# projects
- Wrote a Google Chrome extension in TypeScript to fully automate a billboard display
- Awarded Employee of the Quarter for Q1 2020

West Virginia Army National Guard

15T - UH-60 Helicopter Repairer

09/2007 - 09/2017

Performed the inspection, servicing, installation, and removal of components from H-60 helicopters used in tactical air transport, air assault, and medevac operations, with experience in both flight line and heavy maintenance environments

- Supervised and trained more than a dozen junior mechanics in helicopter maintenance and repair, general cleaning, and related paperwork
- Awarded three Army Achievement Medals for performance
- Completed a three-month, full-time assignment as a mechanic with the National Guard's counter-drug program, with responsibility for performing daily inspections and maintenance on UH-72 and OH-58 aircraft on three bases across West Virginia
- Have 150 accident-free flight hours as a UH-60 Crew Chief, with responsibility for safety of cargo and passengers, helicopter mechanical status issues, and assisting pilots in general flight duties

Projects

Private Cloud Server

I manage a Debian Linux Cloud VM that provides me with private file sync, file duplication, file sharing, online document editing, contact sync, calendar sync, and IRC.
